Assignment-1

Created By
~PINTU MER

1. **Draw a simple diagram (hand-drawn or digital) showing how your phone connects to Instagram, including your device, WiFi router, ISP, and Instagram server. Label each part and the connections.**

2. **List 5 devices you use or see daily that are part of a network (for example: smartphone, smart TV, WiFi router, laptop, smartwatch). For each, write what type of network it connects to (LAN, WAN, PAN, etc.).**

No.	Device	Network Type	Usage
1	Smartphone	WAN/WLAN	Internet browsing and communication
2	Laptop	WAN/WLAN	Internet and file sharing
3	Smart TV	WAN/WLAN	Watching YouTube and Netflix
4	WiFi Router	WAN/WLAN	Connecting devices to the Internet
5	Smartwatch	PAN	Connecting to a smartphone using Bluetooth

3. **Explain the difference between the Internet and an intranet using an example from your college or a public WiFi you have used.**

Internet	Intranet
Public network	Private network
Anyone can access it with an Internet connection	Only authorized users can access it
Used worldwide	Used inside an organization/college
Example: Google, YouTube, Instagram	Example: College student portal or internal Wi-Fi resources

College Example:

- **When I use my college public Wi-Fi to open Google or YouTube, I am using the Internet because these services are publicly available.**

- **If the college Wi-Fi provides access to an internal student portal, lab server, or college-only website that can be accessed only by authorized students, that is an Intranet.**

4. **Pick any one app you use (like WhatsApp, Zomato, or Flipkart) and describe, in 4-5 lines, how data travels from your device to their server and back when you perform a search inside the app.Hint:Mention the devices and networks involved, and what happens when you hit 'search'.**

Example: WhatsApp

1. **I open WhatsApp on my mobile and type something in the search box.**
2. **When I press Search, my phone sends the request through Wi-Fi/mobile network.**
3. **The request travels through the router/ISP and Internet to the WhatsApp server.**
4. **The WhatsApp server processes the request and sends the result back to my phone.**
5. **My phone receives the data and shows the search result in the app.**
